

OpsStack Solutions: Building Brand Authority Through Thought Leadership

A LinkedIn campaign case study demonstrating measurable brand growth through strategic thought leadership content.

751% Growth in Impressions

17,186

Impressions

Achieved in just 8 weeks, compared
to the prior 90-day period

6,242

Members Reached

Across the core target audience of
operations professionals

408

Engagements

A 750% increase demonstrating
authentic audience connection

The Challenge

Limited Brand Awareness

A startup operations consulting firm entering a crowded, trust-driven market.

Credibility First

B2B buyers require demonstrated expertise long before any sales conversation begins.

Complex to Relatable

Translating deep operational expertise into educational, accessible content.

Target Audience Strategy

Decision-Makers Identified

Operations Managers, Supply Chain Leaders, and Business Owners — the professionals who control consulting budgets.

Themes That Resonate

Efficiency, bottleneck resolution, cost reduction, and profitability — the core pain points of the audience.

Awareness-Stage Positioning

Content designed to reach prospects before they recognize their own operational challenges.

Five Content Pillars

Real Experiences

Build authenticity through proven case studies and firsthand accounts.

Operational Insights

Demonstrate expertise with actionable, data-backed takeaways.

Educational Content

Provide genuine value to the audience before asking for business.

Operational Challenges

Showcase problem-solving capability through real-world scenarios.

Leadership & Management

Humanize the brand with personal storytelling and leadership perspective.

Content Strategy Framework

A disciplined, platform-native approach designed to maximize reach and algorithm performance on LinkedIn.

- LinkedIn selected for highest concentration of target decision-makers
- Consistent **Monday / Wednesday / Friday** publishing cadence maintained throughout
- A/B tested messaging styles and post lengths to optimize performance

Key Content Example: \$400K in Annual Savings

1

Counterintuitive Thinking

Challenged convention by slowing operations to dramatically improve quality outcomes.

2

Root Cause Analysis

Identified underlying causes beyond surface-level metrics that others overlooked.

3

Measurable Impact

Delivered \$400K in documented annual savings through applied systems thinking.

Engagement Breakdown

What the Numbers Mean

A total of **408 engagements** signal more than algorithmic reach – they reflect genuine audience interest.

317 Reactions

Strong resonance with professionals encountering these challenges firsthand.

72 Comments

Meaningful two-way conversations that extended content reach organically.

56% Out-of-Network

Content broke beyond existing followers and reached entirely new audiences.

Reaching Decision-Makers

The campaign consistently reached **Operations Managers, Directors of Operations, and General Managers** — precisely the audience positioned to act on consulting engagements.

The highest-performing post (66 reactions, 24 comments) combined professional expertise with a personal leadership story — validating that authentic storytelling resonates most powerfully with a B2B audience.

Key Learnings

1 Demonstrate, Don't Promote

Consulting success depends on showing expertise through evidence — not broadcasting it through traditional promotional messaging.

2 Authenticity Builds Trust

Real experiences and candid storytelling consistently outperformed polished, corporate-style content in both reach and engagement.

3 Value First, Always

Providing genuine value upfront positions a brand as a trusted resource — and drives engagement that compounds over time.

My Role

DIGITAL MARKETING INTERN

End-to-end ownership of strategy, execution, and analysis across the full 8-week campaign lifecycle.

01

Strategy

Developed the five content pillars and defined the overall campaign direction from the ground up.

02

Direction

Defined target audience personas and established brand positioning within the LinkedIn ecosystem.

03

Execution

Built the 8-week content calendar and guided the full content mix across all publishing days.

04

Analysis

Reviewed campaign results, identified top-performing topics, and extracted strategic learnings.
