

Arc'teryx

Customer Satisfaction Survey Report

INTRODUCTION

This report presents **key insights** from a customer satisfaction **survey** of **Arc'teryx** users **across fashion** and **outdoor segments**. Using a tailored **CS Model** and **structured questionnaire**, it **uncovers** customer **experiences** and **highlights opportunities** to strengthen the **brand's impact**.

Research Framework

01

MARKETING DECISION PROBLEM

Arc'teryx, known for high-performance **outdoor gear**, faces the **challenge** of maintaining **authenticity** and technical **credibility** while **appealing** to a **fashion-forward** streetwear **audience**.

02

MARKETING RESEARCH PROBLEM

Identifying the **key factors** that shape consumer perception, brand loyalty, and purchasing behaviour among **outdoor enthusiasts** and **streetwear consumers**.

Research Framework

03

MARKETING RESEARCH QUESTION

How do consumer perceptions of Arc'teryx's **quality**, the impact of **exclusivity** on purchase behavior, and the role of the brand **community** influence **brand identity**, customer **satisfaction**, and long-term **loyalty** across different market segments?

04

MARKETING RESEARCH OBJECTIVE

Understand how **consumers** discover and **perceive** Arc'teryx, **analyze** purchasing **motivations** across segments, and **identify** the **factors** that **impact** customer **satisfaction** and **brand loyalty**.

QUESTIONNAIRE: CONTENT & JUSTIFICATION

The questionnaire used in this research was designed to explore **consumer perceptions, brand awareness, loyalty, and purchase behaviour** regarding Arc'teryx.

The structure and content of the questionnaire was influenced by the principles outlined in Chapters 7 and 8, which emphasize the importance of well-structured survey instruments and effective question design.

QUESTIONNAIRE STRUCTURE

01

Brand Awareness

- Identifies how each segment **discovers** Arc'teryx.
- Outdoor users rely on peer **referrals**, expert **reviews**, and community **forums**.
- Fashion consumers find the brand through **influencers**, **celebrities**, and social media trends.

02

Brand Perception

- Captures consumer **perceptions** using three-word brand associations.
- **Outdoor** users describe Arc'teryx as **durable**, **technical**, and **reliable**.
- **Fashion** consumers see it as **luxurious**, **trendy**, and **status-driven**.

QUESTIONNAIRE STRUCTURE

03

Loyalty & Retention

- Uncovers key drivers of **repeat purchases** among Arc'teryx customers.
- Outdoor users value **durability, weather protection, and function**.
- Fashion consumers seek **style, exclusivity**, and social **validation**.
- Examines the impact of **collaborations** and **pricing** on **loyalty**.

04

Customer Satisfaction

- Confidence in product **reliability** reinforces Arc'teryx's **credibility** across segments.
- **Enthusiasm** signals strong emotional **engagement** and brand **alignment**.
- **Desire** for innovation reveals evolving expectations and **opportunities** to maintain **satisfaction**.

JUSTIFICATION

01

DIVERSE QUESTION TYPES FOR DEEPER INSIGHTS

- **Likert Scale Questions:** used for evaluating perceptions, satisfaction, and likelihood of brand engagement.
- **Multiple Choice Questions:** captures behaviours and preferences, such as product ownership and activity levels.
- **Ranking/Comparative Questions:** used to determine whether consumers view Arc'teryx as more of an outdoor brand or a fashion brand.

02

MINIMIZING BIAS FOR ACCURATE RESULTS

- Questions were **framed neutrally** to avoid bias and leading responses (e.g., "**How would you rate Arc'teryx's ability to balance durability and performance?**").
- Multiple response options were provided to **capture** a **diverse** range of consumer **perspectives**.

JUSTIFICATION

03

LOGICAL FLOW FOR IMPROVED ENGAGEMENT

- The **funnel approach** was used. began with brand **awareness**, gradually narrowing to topics like product **quality, exclusivity, and loyalty**
- This method kept respondents **engaged** and **minimized response fatigue**.

04

ENSURING VALIDITY & RELIABILITY

- **Pre-testing** refined question **clarity** and **structure**.
- Questions were designed to be **mutually exclusive** and **collectively exhaustive**, covering **all consumer perspectives**.
- A consistent answer scale ensured comparability across sections.

JUSTIFICATION

05

RELEVANCE TO RESEARCH OBJECTIVES

- The questionnaire aligns with **research goals** by exploring Arc'teryx's **perception** in both **outdoor** and **fashion markets**.
- By analyzing brand identity, product satisfaction, and exclusivity, the study evaluates Arc'teryx's positioning across both markets.

06

CULTURAL & MARKET SEGMENTATION

- Demographic questions **segment** the market into **key** consumer **groups**.
- Responses reveal **differences** in brand **perception** across **regions and age groups**.

METHODOLOGY

Data Collection

METHOD

- Developed a **35-question questionnaire** for Arc'teryx users in **fashion and outdoor segments**.
- Included **8 blocks**: **1 screening**, **1 demographic**, and **6** related to the **CS Model**.
- **Questions** used a **1-10 scale** (poor to excellent), **except** for **demographic** and **screening sections**.

SAMPLING

- **Collected data** from **3** primary **sources**:
 - Relevant **subreddits** for fashion and outdoor segments.
 - **Friends and family** who own Arc'teryx products.
 - **Social media users** via survey posts.

PROCEDURE

- **Distributed** the questionnaire **via Reddit, Instagram, and personal networks**.
- **Compiled responses** into a **single dataset** to **analyze patterns** across fashion and outdoor consumers.

Customer Satisfaction Model

Quality

Defined by **craftsmanship**, **performance**, **minimal design**, and **versatile functionality** for any setting.

Exclusivity

Boosts **fashion** appeal through **luxury**, **limited drops**, and **exclusivity**, while **outdoor** users prioritize **performance**.

Community

Built through expert **endorsements**, **social media**, and **tailored events**, **uniting** performance and fashion **audiences**.

Customer Satisfaction Model

Brand Identity

Balances **performance** and **luxury**, driven by **authenticity**, **innovation**, and **sustainability**.

Customer Satisfaction

Arc'teryx builds **trust** through **performance**, sparks **excitement** with **innovation** and limited **drops**, and **appeals** to both segments with **cutting-edge design**.

Loyalty

Driven by trusted **communities**, daily **use**, and a sense of **belonging**—focused on **performance** for **outdoor** users and **prestige** for **fashion** consumers.

Customer Satisfaction Model

Cronbach's Alpha

For Key Constructs

Cronbach's Alpha shows our grouped questions consistently measured key constructs, with scores above the 0.70 threshold indicating strong reliability.

DATA ANALYSIS

A hiker is silhouetted against a vibrant sunset sky, standing on a rocky mountain ridge. The background features a series of layered mountain ranges, with the word "QUALITY" overlaid in large, white, bold letters. The sky transitions from a deep orange near the horizon to a pale blue at the top, with wispy clouds catching the low light. The foreground ridge is dark and textured, showing some sparse vegetation and rocky patches.

QUALITY

Descriptive Statistics

- Respondents rated Arc'teryx highly on Quality items – overall mean range ~ 7.50–8.33
- Importance of Quality (8.33) is the highest, indicating how crucial quality is in purchase decisions
- Versatility (7.50) is the lowest, suggesting some uncertainty about using Arc'teryx in multiple settings
- Reliability, Craftsmanship, Appearance all score around 8.0, showing strong positive perceptions

Cross Tabs

- Outdoor vs. Non-Outdoor: Outdoor respondents give slightly higher ratings on Durability, Reliability, and Appearance, but the differences are not huge
- Age & Gender: Means vary somewhat, but overall patterns remain consistent (everyone sees Arc'teryx as high-quality)
- No major shifts found in how different demographics view Quality—everyone generally agrees it's strong

T-test Statistics

- No statistically significant differences ($p > 0.05$) on Q7–Q12 when comparing demographic groups (e.g., age, gender)
- Outdoor vs. Non-Outdoor T-tests also show no p-values under 0.05, but trends suggest outdoor users might rate Reliability/Durability slightly higher
- Overall: The data confirms broad agreement that Arc'teryx is high-quality across groups

Cross Tabs

- Outdoor Enthusiasts: Highest average scores on Durability (Q9) and Reliability (Q10)
- Non-Outdoor: Still rate quality favorably, but they're less focused on technical performance
- Implication: Outdoor marketing resonates strongly, but the brand's quality appeal extends to all customer segments

Component Score Coefficient Matrix

	Component 1
How would you rate the appearance of Arc'teryx's products.	.158
How would you rate Arc'teryx' products versatility for outdoor and urban settings?	.188
How would you rate Arc'teryx's ability to combine durability and performance in its products?	.219
How would you rate the reliability of the Arc'teryx products in the conditions for which you use them?	.216
How would you rate the craftsmanship of Arc'teryx products?	.215
How important is the quality of Arc'teryx products in your purchasing decisions?	.196

KEY TAKEAWAYS

01

Arc'teryx quality is universally praised, with average scores spanning from 7.50 for Versatility to 8.33 for the Importance of Quality.

02

Versatility lags slightly behind at 7.50, suggesting a chance to highlight multi-environment use.

03

The brand should maintain strong reliability, craftsmanship, and aesthetics while clarifying how products adapt to various settings.

EXCLUSIVITY

Descriptive Statistics

- Arc'teryx is viewed as a high-end brand (**mean = 8.17**) with moderate value placed on exclusivity (**6.72 & 6.17**), it is important, but not the main factor driving customer decisions.
- Limited-edition releases (**7.03**) and trendiness (**7.40**) hold moderate appeal; not the dominant factors in brand attraction.
- Arc'teryx is recognized for its premium quality and exclusivity, but these factors, along with trendiness and limited editions, moderately influence consumer preferences.

Correlations

- A moderate positive correlation (**0.453**) suggests consumers who view Arc'teryx as high-end also value its exclusivity.
- A strong correlation (**0.738**) between limited-edition appeal and exclusivity highlights the importance of scarcity in driving consumer interest.
- A moderate correlation (**0.615**) indicates that trend-conscious consumers are also more likely to prioritize exclusivity.
- The weak correlation (**0.181**) between trendiness influence and exclusivity importance shows that trendiness has a minor role in the importance of exclusivity.

T-test Statistics

- Exclusivity has a negligible impact on the outcome (**B = 0.005, p = 0.612**), with no statistically significant relationship.
- The lack of statistical significance suggests that exclusivity does not strongly influence consumer perceptions or satisfaction.
- Outdoor and fashion consumers may prioritize different factors, exclusivity likely playing a more prominent role for fashion consumers

Cross Tabs

- Non-outdoor consumers place higher value on exclusivity than outdoor consumers.
- Outdoor consumers focus more on functionality than on exclusivity.
- Exclusivity influences brand perception for both groups, with a stronger impact on non-outdoor consumers.
- Non-outdoor consumers are more likely to respond to limited-edition releases.

Component Score Coefficient Matrix

	Component 1
How would you rate Arc'teryx's products in terms of being high-end?	.224
How would you rate the appeal of limited-edition Arc'teryx releases?	.295
How would you rate the exclusivity of Arc'teryx product releases?	.297
How would you rate the influence of Arc'teryx's current trendiness?	.231
How important is the exclusivity of Arc'teryx's products?	.239

KEY TAKEAWAYS

01

The high mean for high-end perception (8.17) and its correlation with exclusivity (0.453) suggests that Arc'teryx should align its marketing to highlight both premium quality and exclusivity.

02

With a mean of 7.03 for limited-edition appeal and a strong correlation (0.738) with exclusivity, Arc'teryx should prioritize exclusive product releases to drive consumer interest.

03

Arc'teryx should tailor its marketing approach by emphasizing exclusivity for fashion consumers and focusing on performance and durability for outdoor users.

BRAND IDENTITY

Descriptive Statistics

- Respondents rated Arc'teryx highly across all brand identity questions - specifically the importance of brand identity in purchasing intent (**mean = 7.97**)
- Respondents view Arc'teryx as innovative, sustainable, and authentic
- Scores high on all brand identity measures (**mean range = 7.0 -8.0**)
- Strong perception of brand's core values

Cross Tabs

- Arc'teryx is strongly perceived as a brand with purpose and identity amongst consumers
- Outdoor individuals rate brand identity higher on all measures
- Most value is placed on brand identity importance, making it an important factor in purchase intent

T-test Statistics

- No statistically significant differences (**p-value > 0.05**) as trends favour outdoor respondents
- The outdoor respondents consistently see a higher brand identity score
- Respondents that identify as outdoorsy positively influences brand perception

Cross Tabs

- Outdoorsy respondents have higher brand identity ratings than non outdoorsy respondents
- Biggest gap is present in how brand identity influences purchases
- Arc'teryx outdoor positioning resonates with outdoor-aligned consumers
- Marketing should be focused on outdoor values and innovation for further engagement

Component Score Coefficient Matrix

	Component 1
How would you rate Arc'teryx's social media and influencer engagement?	.279
How would you rate the effectiveness of Arc'teryx brand led events in boosting community engagement?	.281
How would you rate the influence of athlete and expert endorsements in your decision to purchase Arc' teryx products?	.268
How would you rate Arc' teryx's efforts in maintaining its technical outdoor credibility while expanding its fashion presence?	.236
How important is it for Arc'teryx to engage with their community?	.229

KEY TAKEAWAYS

01

The high ratings represent Arc'teryx as innovative and authentic - representing a competitive advantage

02

Outdoor consumers value Arc'teryx's identity more than non outdoor consumers - focus its messaging to reflect its core consumer group

03

Keep emphasizing sustainability, innovation, and its outdoor heritage in its promotional material to foster stronger connections and loyalty

COMMUNITY

Descriptive Statistics

- Respondents rated Arc'teryx community questions as “ok” with an overall mean of 6.77.
- The highest contributing question was the importance of Arc'teryx engaging with their community, posting a mean of 7.55. This is the highest average, but scoring under 8 identifies that most consumers aren't super pushy for engaging with the company.

Correlation

- This Factor contains a wide range of correlations (0.265 – 0.616) with social media & influence behaviour generally having the stronger correlations.
- The strongest correlation exists between brand-led events and athlete endorsements.
- The weakest correlation was between importance of community engagement and maintaining credibility while expanding fashion.

Component Score Coefficient

- Components of Community factor rated from most significant to least significant:
 - Brand Event Effectiveness – 0.281
 - Social Media Engagement – 0.279
 - Endorsement Influence – 2.68
 - Technical/Fashion Balance – 0.236
 - Community Engagement Importance – 0.229

KEY TAKEAWAYS

01

Community is valued but not the top priority. Customers appreciate community, but with the highest mean at 7.55 suggests it's not in critical demand.

02

Brand-Led Events and Endorsements are strongly linked. The strongest correlation exists between the brand-led events and influence of athlete endorsements

03

Social Media & Influence Behavior Shows Stronger Correlations within the Community Factor: This suggests that how Arc'teryx engages online and through influencers is closely tied to other aspects of their community perception.

SATISFACTION

Descriptive Statistics

- Respondents to the “satisfaction” factor rated questions with strong satisfaction ratings with an overall mean of 7.83.
- The highest contribution to the overall mean was “how satisfied are you with Arc’teryx products overall” with mean = 8.14.
- The other question means were 7.26 and 8.08, when put together there is a strong satisfaction overall with Arc’teryx products from its consumers.

Correlation

- This factor has correlation scores that range from 0.432 – 0.778.
- The highest correlation is between satisfaction while wearing Arc’teryx, and overall satisfaction. This makes a lot of sense, since satisfaction in a product will lead to overall brand satisfaction too. 0.778 represents a very strong correlation.
- The other correlations represent a moderately weak correlation at 0.432 and 0.470 when comparing with product innovations.

Component Score Coefficient

- Components of Satisfaction factor rated from most significant to least significant:
 - Satisfaction with products – 0.908
 - Satisfaction wearing Arc’teryx – 0.894
 - Product Innovations – 0.715

KEY TAKEAWAYS

01

High Overall Product Satisfaction Drives the Factor: Arc'teryx should prioritize maintaining and enhancing the quality and performance of their core product offerings as this has the strongest positive impact on customer satisfaction.

02

Strong Link Between Wearing Satisfaction and Overall Satisfaction: The very strong correlation (0.778) between satisfaction wearing Arc'teryx and overall satisfaction suggests a significant relationship. Positive experiences with the feel and use of the garments strongly contribute to overall brand satisfaction.

03

Satisfaction with Product Innovations is Moderately Correlated but Less Significant: While innovation is important, Arc'teryx might consider focusing their marketing efforts more on overall quality of their existing products, as these appear to have a stronger immediate impact on overall satisfaction.

LOYALTY

Descriptive Statistics

- Respondents rated the loyalty questions positively, with an overall mean of **4.03** on a 5-point scale.
- All questions were fairly consistent, ranging from **3.87 – 4.14**
- Arc'teryx sees strong and consistent brand loyalty in the form of repeat purchases and recommendations
- The lowest scoring question (**mean = 3.87**) was relating to choosing Arc'teryx over competitor's

Correlation

- This Factor contains strong correlations among its questions, with scores ranging from **0.537–0.621**
- A strong correlation exists between repeat purchases and brand preference and between brand preference and recommendation
- The weakest correlation was between repeat purchases and recommendation

Component Score Coefficient

- Components of Loyalty factor rated from most significant to least significant:
 - Preference – **0.407**
 - Purchase Behaviour – **0.392**
 - Recommend – **0.383**

KEY TAKEAWAYS

01

Arc'teryx enjoys strong customer loyalty, with high likelihoods of recommendation and repeat purchases

02

Brand preference has room for improvement—while customers are satisfied, some still consider competitors

REGRESSION ANALYSIS

REGRESSION ANALYSIS

PREDICTING SATISFACTION

Coefficients^a

Model		Unstandardized Coefficients		Standardized Coefficients	t	Sig.
		B	Std. Error	Beta		
1	(Constant)	-.004	.075		-.059	.953
	Quality Factor	.554	.126	.545	4.385	<.001

	Brand Identity Factor	.381	.139	.378	2.748	.008
	Screening Factor	-.044	.095	-.044	-.462	.646

a. Dependent Variable: Satisfaction Factor

01

- $R^2 = 0.617 \rightarrow$ Slight increase, still strong explanatory power.
- Significant Predictors:
 - Quality ($\beta = 0.545$, $p < 0.001$)
 - Brand Identity ($\beta = 0.378$, $p = 0.008$)
- The overall model is statistically significant
- Quality is the most influential driver of satisfaction
- Community, Exclusivity, and Screening factors do not significantly affect satisfaction

REGRESSION ANALYSIS

LOYALTY PREDICTED BY SATISFACTION

Coefficients ^a					
Model		Unstandardized Coefficients		Standardized Coefficients	
		B	Std. Error	Beta	t
1	(Constant)	.007	.090		.074
	Satisfaction Factor	.631	.090	.631	6.995
					Sig.
					.941
					<.001

a. Dependent Variable: Loyalty Factor

02

- $R^2 = 0.398 \rightarrow$ Satisfaction alone explains 39.8% of Loyalty
- $\beta = 0.631, p < 0.001$
- ANOVA $\rightarrow$ the model is highly significant = satisfaction is a strong predictor of loyalty
- Standardized beta of 0.631 indicates a large effect size

Customer Satisfaction Model

Limitations

01

Subreddits Used

Due to existing community guidelines for the popular subreddits that wouldve generated significant data, we were unable to use these as sources, and had to utilize less popular options

02

Data Collection Split

Because we left these survey's on social media and were unable to monitor who was filling them out, we were unable to find a discernable split between outdoor enthusiasts and streetwear enthusiasts, possibly leaning to skewed data

03

Survey Completion

When looking at our survey results, you can see that many respondents did not complete the survey. Of the 81 respondents, only 49 completed the survey in its entirety

CONCLUSION

Based on the implications Quality and Brand Identity have on Customer Satisfaction, Arc'teryx would be much better at serving and catering their marketing towards outdoor enthusiasts as opposed to fashion enthusiasts

QUALITY

This factor has the most substantial weight in customer satisfaction, being the most statistically important factor. This factor also saw the most positive responses of the 4 factors mentioned in the survey

EXCLUSIVITY

This factor generally received positive responses from the respondents of this survey. However, this factor is also the least statistically impactful on customer satisfaction

COMMUNITY

This is the only factor listed in the customer satisfaction model that had an inverse relationship with satisfaction, and was also the most poorly received amongst the respondents

BRAND IDENTITY

While not as strong as the *Quality* factor, Brand Identity still has substantial statistical importance concerning customer satisfaction. This factor also saw the second most positive responses among participants

Thank You

PERSONAL ETHICS STATEMENT**TELFER SCHOOL OF MANAGEMENT
ADM 3323 PRESENTATION REPORT (FINAL)**

By signing this Statement, I am attesting to the fact that I have reviewed not only my own work, but the work of my colleagues, in its entirety.

I attest to the fact that my own work in this project meets all the rules of quotation and referencing in use at the Telfer School of Management at the University of Ottawa, as well as adheres to the fraud policies as outlined in the Academic Regulations in the University's Undergraduate Studies Calendar. [Academic Fraud Webpage](#)

To the best of my knowledge, I also believe that each of my group colleagues has also met the rules of quotation and referencing in this Statement.

I understand that if my group assignment is submitted without a signed copy of this Personal Ethics Statement from each group member, it will be interpreted by the Telfer School that the missing student(s) signature is confirmation of non-participation of the student(s) in the required work.
